

# RECY THREE

ATLANTIS

**MAIN FABRIC:** 60% RECYCLED COTTON CANVAS  
40% COTTON CANVAS

**SIDE&BACK:** 100% RECYCLED POLYESTER

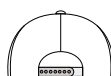

The Recy Three is our new challenge that weaves three different materials, mixing 60% recycled cotton and 40% classic cotton, adding a stylish recycled polyester mesh and closure in R-PET.

# RECYCLED POLYESTER

Recycled polyester (or rPET) is made by breaking down used plastic (usually bottles) into small, thin chips, which are processed and finally turned into yarn.

This is an example of “circular economy”: **designing something by using recyclable material.**

1.

Used plastic bottles are collected and cleaned

2.

Bottles are shredded into tiny pellets

3.

Pellets are crushed and melted

4.

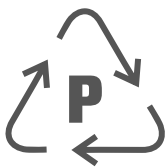

The molten plastic is extruded and stretched into thread

Each RECY THREE cap recycles 0,5 bottles

## FEATURES

recycled polyester

## ACCESSORIES

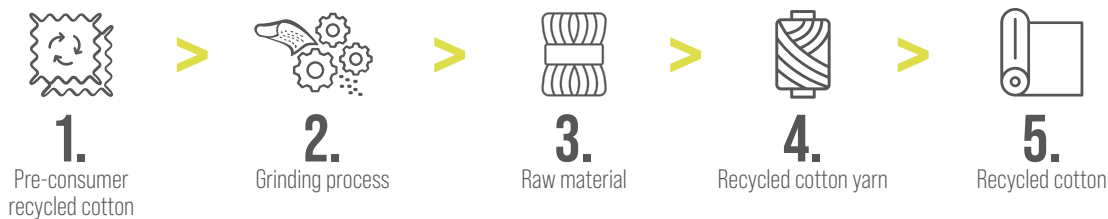

The new models made of recycled material can be identified from a flag woven label inside.

# RECYCLED COTTON

Recycled cotton is regenerated cotton fiber made from repurposed production scraps or second-hand clothes. The pieces of fabrics are sorted by color, shredded into yarn and further into raw fiber. The result is then spun back into yarns for reuse in other products.

**Recycled cotton can find new life** in many different textile accessories **using less energy, water, dyeing and can divert many products from landfills.**
